

3M FLOOR PADS

3M 4100 WHITE SUPER POLISH PAD - Produces reflective, mirror-like floor appearance when used with a water mist. Delivers the burnished appearance of a lambs wool pad when used dry.

3M 7300 HIGH PRODUCTIVITY STRIPPING PAD - Features an entirely new type of construction that

utilizes larger diameter nylon fibers and larger abrasive particles in a very open web. The flow-through action rinses out dirt and finish to reduce loading, so the pad can perform longer. The result is a pad that removes old finish, dirt and build-up more effectively than stripping pads made the conventional way. This is a very aggressive pad. Use caution on soft floors.

3M 7200 BLACK THICK STRIP PAD - Cuts away old finish and wax with ease. Thick cushion construction follows contour of uneven floors.

3M 7100 BROWN STRIPPING PAD - Designed for use with 3M 303 Dri-Strip Aerosol. Special open construction to reduce pad loading. Can be used for wet stripping as a less aggressive pas on softer floors.

3M 5300 BLUE CLEANER PAD - For spray cleaning with 3M 202 Foam Scrub Aerosol. Also good for wet scrubbing prior to re-coating.

3M 5100 RED BUFFER PAD - For spray cleaning normal traffic areas with 3M Spray Cleaner A-101. Quickly removes light scuff marks while cleaning and polishing floor to high luster. Suitable for dry buffing.

SUPER & ULTRA HIGH SPEED FLOOR PADS

3M 3400 TAN BURNISH PAD - Produces a brilliant wet-look gloss with harder finishes or in high traffic areas using a 1500 - 3000 RPM machine.

3M 3100 AQUA BURNISH PAD - Produces a brilliant wet-look gloss with softer finishes or in low traffic areas using a 1500 - 3000 RPM machine.

3M 4100 BEIGE SUPER HIGH SPEED PAD - Specifically

developed to produce a beautiful glossy finish while removing scuffs and black marks on 600 - 1500 RPM machines.

3M 3200 TOPLINE BURNISH PAD - This pad dry burnishes at 1500 - 3000 RPM to dramatically renew wet-look gloss. Removes black marks while burnishing with minimal finish removal. Peach.

3M 3600 ERASER PAD - Designed for best removal of scuff marks while burnishing for a nice shine. Pink.

3M M/A+ BLUE BLEND PAD - This pad was created for harder finishes and higher traffic areas. Removes marks and scratches.

3M 4200 BEIGE BUFF PAD - Dry buff or spray buff for gloss. Beige.

UHS NATURAL LIGHT PAD - A natural fiber pad designed for high speed buffing. natural blend, aggressive for use on medium to hard finishes. The original burnishing pad still preferred by many professionals.

HIGH SPEED INSTALOK - Specially designed for use with super and ultra high machines. Absorbs vibration, wobble and bounce, reducing operator fatigue and wear and tear on machinery.
